### **Rental count**

The rental period starts when the customer has received the products at his facility and ends when the products are handed back to the carrier for return. Kron Technologies Inc will look closely at the rental period over tracking number data and compare initial rental payment with real rental period. If a camera arrives at the customer's location before noon, a full day will be counted as the first rental day. If a camera arrives after noon, a half day will be counted. Daily rates are detailed above. The last rental day will be counted as a half day if the items are given to the carrier before noon local time and a full day if done later.

The customer will owe a set amount per day depending on the material being rented, with the exception of half day (for late deliveries or early pickup) and a 25% reduced rate for weekends.

Upon return of the products to Kron Technologies' facility and if the rental set is in good condition, the customer will either be all set if the rental period hasn't exceed what he initially paid for or will be charged an extra fee corresponding to the additional days period he has kept the items for. Please note that no refund will be given if the customer rented the products for a shorter period that he initially paid for.

An extra \$50 fee will be charged if complications happen at customs and the customer requires our shipping department's assistance.

### **Returns**

Equipment rented to Kron Technologies must be returned in the same condition as it was initially shipped to the customer. Any major physical damage such as breaks, cracks, missing component, sticky, dirty camera will be subject to an extra charge.

### **Purchase after rental**

In the event that the customer is willing to purchase the camera after rental, 50% of the camera's rental price will be discounted from the overall purchase price.
