

## Chronos 2.1 Internet Software Update Instructions

Before starting the update process, please ensure that the camera is connected to the internet via the ethernet port, and connect the AC adapter.

1. Access the **Storage** tab from the **Util** button on the main screen of the camera. The following screen will be shown:

2. Push the **Apply Software Update** button. A new menu will pop up with the software update options. Verify that the package repository is **Voyager**, and then push **Check for Updates**.

3. The camera will automatically search for updates and prompt you to apply any updates that are found. Confirm that you would like to update, and the camera will download and install updates as necessary. The camera will restart automatically when the process is complete.
